CSE Student Specializing in AI & ML | Learning Programming and Web Development | Subject Matter Expert

Vishakhapatnam, Andhra Pradesh, India

Summary

I am a Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning. My journey into technology started when I joined engineering, and although it felt overwhelming at first, it quickly became an area I wanted to explore deeply.

I am fascinated by how rapidly technology is evolving and how it can transform the way we live and work. Whether it’s artificial intelligence, cloud technologies, or cybersecurity, I am always curious to understand how these systems operate and what possibilities they can unlock.

As a learner, I am open-minded and adaptable. My interests often evolve as I discover new ideas and tools. I enjoy setting short-term goals, going deep into topics that inspire me, and learning at my own pace. While I sometimes balance multiple interests at once, I am committed to building knowledge step by step and growing as a person along the way.

I believe learning is a continuous journey, and I am excited to keep exploring, improving, and discovering where technology will take me next.
